No. 713.—MANUFACTURES OF NONFERROUS METALS AND ALLOYS,<sup>1</sup> 1925

[NOTE.—This table shows the production of the commodities specified, whether made as primary or as secondary products by the industries reporting them. The census designations of the industries in which these commodities are made as primary products are as follows: Babbitt metal, white metal, type metal, and solder; brass, bronze, and other nonferrous alloys, and manufactures of these alloys and of copper, not specifically classified; lead bar, pipe, and sheet; and smelting and refining, metals other than gold, silver, or platinum, not from the ore.]

[Quantities in thousands of pounds; values in thousands of dollars]

| Kind  | Quantity | Value    | Kind   | Quantity | Value    |
|---|----------|----------|--|----------|----------|
| Total value.....                            |          | 708, 994 | Tubing, brass (practically all brass).....                   | 12, 468  | 3, 787   |
| Ingot and pigs.....                         |          | 149, 563 | Wire, bare <sup>1</sup> .....                                |          | 51, 006  |
| Brass.....                                  | 171, 713 | 19, 940  | Brass.....   | 54, 593  | 9, 921   |

| Copper.....                                 | 57, 954  | 14, 909  |  |          |          |
| Lead.....                                   | 105, 776 | 11, 800  |  |          |          |
| Other metals.....                           |          | 702      |  |          |          |

<sup>1</sup> This table does not include data for establishments engaged in smelting and refining ores containing copper, lead, zinc, and other nonferrous metals.

<sup>2</sup> Does not include wire made by establishments engaged primarily in the drawing of wire.

## No. 718.—SILVER: PRICE, AND VALUE OF SILVER IN THE DOLLAR

[NOTE.—The London price represents the equivalent in American money at par of exchange, converted to the basis of the ounce 1,000 fine. The commercial ratio and the value of silver (371 grains) in the dollar are computed from this London price to and including 1917, but up to that time the New York and London quotations were close together, the departure since being due to the depreciation of the pound sterling, for 1918 to 1924, inclusive, these computations are based on the New York average price. Beginning 1925 the ratio reverts again to the London price]

## No. 719.—COAL PRODUCTION: QUANTITY AND VALUE

[NOTE.—Quantities in thousands of short tons; values in thousands of dollars. Includes coal consumed at mines. Figures for anthracite relate to Pennsylvania output only. Bituminous coal includes brown coal and small amounts of anthracite outside of Pennsylvania. Comparatively little coal is held in stock at the mines]

| Year or yearly average | Quantity |            |            | Year                  | Quantity |            |            | Value      |            |

## No. 730.—RETAIL PRICES OF GAS IN PRINCIPAL CITIES

[NOTE—Prices are net per 1,000 cubic feet of gas for household use. Prices for manufactured gas are based on a family consumption of 3,000 cubic feet per month. In cities where a service charge or a sliding scale is in operation families using less than 3,000 cubic feet per month pay a somewhat higher rate than shown, while those consuming more than this amount pay a lower rate. The figures represent quite closely the actual monthly cost of gas per 1,000 cubic feet to the average wage-earner's family. Prices for natural gas and for manufactured and natural mixed gas are based on a family consumption of 5,000 cubic feet per month.]

## No. 731.—NATURAL GAS AND NATURAL-GAS GASOLINE

[NOTE.—Quantities of gas in millions of cubic feet, of gasoline in thousands of gallons; values in thousands of dollars. Production figures for gas refer only to that marketed, in addition to which considerable quantities are used by producers, and large quantities are wasted or lost. Values given are at the point of consumption. Consumption figures by States differ greatly from production figures by reason of interstate transportation.]

\* Preliminary. \* Includes gas piped from Oklahoma and consumed in Arkansas.

\* Includes 12,000,000 cubic feet piped to Canada in 1924, 68,000,000 in 1925, and 79,000,000 in 1926.

\* Includes 27,000,000 cubic feet piped to Mexico in 1924, 64,000,000 in 1925, and 87,000,000 in 1926.

\* Includes Colorado. \* Not shown separately.

<sup>1</sup> Estimated.

<sup>2</sup> Includes insignificant quantities not distributed by regions and States.

<sup>3</sup> Southwestern Indiana reported with Illinois beginning 1921; previously with Lima-Indiana region.

<sup>4</sup> Kentucky includes report for Tennessee for 1890 and 1900.

<sup>5</sup> Not shown separately prior to 1924.

<sup>6</sup> Average for years 1924 and 1925.

<sup>7</sup> Pennsylvania includes New York for 1880 and 1890.

### No. 736.—STOCKS OF CRUDE AND REFINED MINERAL OILS ON DECEMBER 31

<sup>1</sup> Fuel oil held in California is included beginning 1924.

<sup>2</sup> Exclusive of producers' stocks.

<sup>3</sup> Stocks east of California are revised to include 2,043,000 barrels of crude in coastwise transit, and stocks in California are revised to include 800,000 barrels of working stocks not previously reported.

<sup>4</sup> Refinery stocks in California are included with refinery stocks east of California prior to 1924.

<sup>5</sup> Not available.

<sup>6</sup> Includes wax, coke, asphalt, and residuum in barrels.

### No. 739. PETROLEUM PRODUCTS: OILS RUN TO STILL, OUTPUT OF REFINERIES, STOCKS, EXPORTS, AND APPARENT CONSUMPTION OF PRODUCTS

[Note: Stocks are those in the hands of refiners only. Hence "apparent consumption" represents deliveries by refiners to dealers and consumers. Exports include shipments to noncontiguous territories. Consumption figures for kerosene, gas and fuel oil, and lubricating oil for 1922 to 1927 take into account comparatively small imports not shown separately, and for which no data were available prior to October, 1922. In 1927 these imports were as follows: Kerosene 55,000 barrels; gas and fuel oil, 8,123,000 barrels; lubricants, 7,000 barrels.]

[In thousands of barrels, except wax (thousand pounds), and coke and asphalt (thousand short tons)]

## No. 742.—PETROLEUM: PRICES OF CRUDE AND REFINED PRODUCTS

[NOTE.—Prices of crude and fuel oil in dollars per barrel, others in cents per gallon. Compiled by Joseph C. Pogue. The weighted average prices are computed from five principal grades of crude oil at wells, from five markets each for kerosene and gasoline from tank wagon, from five refining locations for fuel oil, and for five grades of lubricating oil]

| Year | Crude  | Gasoline | Kerosene | Fuel oil | Lubricating oil | Month, 1927 | Crude  | Gasoline | Kerosene | Fuel oil | Lubricating oil |

# No. 743.—PORTLAND CEMENT: PRODUCTION, SHIPMENTS, EXPORTS, AND IMPORTS

[Note.—Imports are "Imports for consumption" and exports include both domestic and foreign cement but not that going to noncontiguous territories. Both imports and exports include all kinds of hydraulic cement, most of which is Portland. "Shipments" include exports made directly by manufacturers. (See Table 744)]

<sup>1</sup> Of 376 pounds.

<sup>2</sup> Includes shipments to Alaska, Hawaii, and Porto Rico.

Source of Tables 743 and 744: Bureau of Mines, Department of Commerce.

**No. 745.—CEMENT PRODUCTION: QUANTITY, BY KINDS, AND TOTAL VALUE**

[NOTE.—Portland cement is expressed in barrels of 376 pounds; masonry, natural, and puzzolan cement in 1921 and later years in 376-pound barrels but prior to 1921 in barrels of 240, 265, and 320 pounds, respectively. For 1912 through 1924 the figures for masonry, natural, and puzzolan cements represent shipments]

| Year      | Production in thousands of barrels |          |                                | Total value in thousands of dollars | Year      | Production in thousands of barrels |          |                                | Total value in thousands of dollars |

<sup>1</sup> From reports of Bureau of Mines, Department of Commerce.<sup>2</sup> No data.<sup>3</sup> Clay brick, including refractory block or tile, boiler and locomotive tile, tank blocks, and other re-  
fractory clay products—8-inch equivalent.<sup>4</sup> Not reported separately.<sup>5</sup> Not shown separately. Included in "All other pottery products."<sup>6</sup> In addition considerable quantities of electric-light shades, globes, etc., were made in 1914 by establish-  
ments engaged primarily in the manufacture of electrical goods.<sup>7</sup> Included in "All other products."<sup>8</sup> Including jelly glasses, tumblers, and goblets, but not including bottles, etc.<sup>9</sup> Including demijohns and carboys.

## 32.—MANUFACTURES

Data in this section relate to continental United States.

For additional statistics regarding food manufacturing industries and mineral manufacturing industries see sections on Farm Animals and Animal Products, Farm Crops and Foodstuffs, and Mining and Mineral Products.

GENERAL NOTE.—Prior to 1899 census statistics of manufactures were collected decennially and from then to 1919 every five years. Beginning with 1921 data are being collected every two years. For the census of 1899 and previous censuses, data were collected for both factories and hand and neighborhood industries. For the census years 1904 to 1919, inclusive, factories having products valued at \$500 or more were included, but the statistics for 1921 (except as to certain major items shown in Table 754 only), 1923, and 1925 relate only to establishments having products valued at \$5,000 or more. However, in 1921, establishments having products valued at \$500 or more but less than \$5,000, while constituting 21 per cent of the total number of establishments, employed only six-tenths of 1 per cent of the total number of wage earners, and had an output of only three-tenths of 1 per cent of the total value of the product.

The statistics for automobile repairing, collected for 1914 and 1919, have been excluded from Table 753 and from Tables 755 to 757. Data for the "Coffee and spice, roasting and grinding" industry have also been omitted for all years in the third section of Table 753.

Figures for wages and value of materials and products are greatly affected by changes in the buying power of money or, in other words, by the general levels of prices and wages.

Figures of total cost of materials and total value of products for many individual industries, for all groups of industries and especially for all industries combined, involve much duplication. This is due to the use of products of a given establishment as material for another in the same or a different industry.

<sup>1</sup> To make the percentages for the numbers of establishments comparable, those for all 4 years have been based on the numbers of establishments reporting products valued at \$5,000 or more. The percentages for wage earners and value of products, however, have not been similarly adjusted, the comparability of these percentages having been affected very slightly by the omission of small establishments in 1923 and 1925.

<sup>2</sup> No data for establishments with products under \$5,000 in value have been tabulated for 1923 and 1925.

<sup>3</sup> The data for the 53,999 establishments in the "Less than \$5,000" class are not included in other tables.

<sup>4</sup> Data for \$500,000 to \$1,000,000 class and \$100,000 to \$500,000 class combined.

# No. 755.—MANUFACTURES: PRIME MOTORS, MOTORS, AND GENERATORS, BY NUMBER AND RATED CAPACITY

[Note.—"Primary power" includes renewable electric power, but not other rented power. No data for prime motors were collected for 1921. To render all statistics comparable with those for 1925, figures for power other than electric and data for the "Automobile repairing" industry have been deducted for 1919, and data for the "Office and apico, roasting and grinding" industry, for 1919 and 1921.]

<sup>1</sup> Statistics for 1919 and 1914 in the case of a few groups differ from those in certain previous reports because of the exclusion here and the inclusion in the previous reports of data for rented power other than electric.

<sup>2</sup> No data for the "Coffee and spice, roasting and grinding" industry were tabulated at the census for 1925, and therefore the statistics for the earlier years have been adjusted by deducting the figures for this industry.

<sup>3</sup> The manufacture of asbestos textiles, formerly treated as an industry in Group 2, is now classified as a branch of the "Asbestos products, other than steam packing or pipe and boiler covering" industry, in Group 9. The statistics for 1923 and earlier years have accordingly been adjusted to include the data for asbestos textiles in Group 9.

<sup>4</sup> The manufacture of engravers' materials, formerly classified in Group 16, is now classified in Group 7. The statistics for 1923 and earlier years have accordingly been adjusted to include the figures for this industry in Group 7.

<sup>5</sup> The fact that the increase in the chemical group is less than in most others is due to the prohibition amendment, greatly reducing the production of distilled, fermented, and vinous liquors. Excluding these, the principal items for 1914 and 1925 become, respectively, as follows: Wage earners, 278,497 and 379,415; wages, \$166,758,600 and \$504,286,000; value of products, \$2,019,877,000 and \$6,876,885,000; value added by manufacture, \$715,013,000 and \$2,232,304.

## No. 757.—MANUFACTURES: SUMMARY FOR INDIVIDUAL INDUSTRIES

**Notes.**—The figures for some industries do not fully represent the totals properly assignable to them, while those for some other industries are overstated, as in many cases establishments manufacture two or more classes of commodities, and figures for the entire establishment are placed in the industry in which it is primarily engaged. In figures for cost of materials and value of products extensive duplication occurs due to the use of the products of one establishment as the materials of another. As to comparability of figures, see general note, p. 749. Data for primary horsepower were not collected in 1921. Horsepower figures for 1914 and 1919 in certain industries differ from those in previous reports because of exclusion here and inclusion in certain previous reports of data for rented power other than electric. For totals for all industries and for 16 great groups, see Table 756.]

| Industry   | Year | Number of establishments | Wage earners (average number) | Wages   | Cost of materials | Value of products | Value added by manufacture | Primary horsepower |
|--|------|--------------------------|-------------------------------|---------|-------------------|-------------------|----------------------------|--------------------|
| Expressed in thousands of dollars  |      |                          |                               |         |                   |                   |                            |                    |

|  | 1921                | 16   | 1,506                                  | 2,076                             | 9,886                | 16,246               | 6,360                                 | -----                      |
|  | 1919                | 95   | 17,004                                 | 25,086                            | 130,717              | 208,601              | 77,884                                | 97,766                     |
|  | 1914                | 82   | 6,486                                  | 4,720                             | 64,062               | 76,504               | 12,442                                | 11,900                     |

<sup>1</sup> At the census of 1923 a number of important establishments failed to make returns, consequently the figures for this year are incomplete and are not comparable with those of 1925 or those prior to 1923.

<sup>2</sup> No data for the coffee and spice, roasting and grinding industry were tabulated at the census for 1925, therefore statistics for the earlier years have been adjusted by deducting the figures for this industry.

<sup>3</sup> Includes cereal beverages ("near beer" and similar soft drinks) for 1925, 1923, and 1921, but not for earlier years.

<sup>4</sup> The manufacture of asbestos textiles, formerly treated as an industry in this group is now classified as a branch of the "Asbestos products, other than steam packing or pipe and boiler covering" industry, p. 768, therefore data have been excluded from statistics for textile mill products for 1923 and earlier years.

<sup>5</sup> Because of a change in classification no comparable statistics can be given for prior years.

<sup>6</sup> "Gloves and mittens, cloth" included in "furnishing goods, men's," for 1914.

<sup>7</sup> Formerly reported as "clothing, horse."

<sup>8</sup> "Asphalted-felt-base floor coverings" included in "linoleum" for 1914.

<sup>9</sup> Includes "oakum" for 1923 and 1914.

<sup>10</sup> Similar products are manufactured to a large extent by steel works and rolling mills. The figures here given refer only to establishments engaged primarily in the manufacture of the specified classes of products.

<sup>11</sup> Included in "foundry and machine shop products" for 1914. (See p. 771.)

<sup>12</sup> Data for establishments engaged in job welding are included in the figures for 1923 and earlier years, but are not included for 1925, as job welding establishments were not canvassed for that year.

<sup>13</sup> "Tin plate and terneplate" are treated as products of the "Iron and steel, steel works, and rolling mills" industry.

<sup>14</sup> Classified in other industries for 1925.

<sup>15</sup> Includes "show cases" and "store and office fixtures."

<sup>16</sup> Formerly reported as "looking-glass and picture frames."

<sup>17</sup> "Rubber goods not elsewhere classified" includes data formerly classified as "belting, rubber," for 1914 to 1923. For 1919 and 1914 also includes "rubber tires and inner tubes," data for which were not specifically called for at those censuses.

<sup>18</sup> The manufacture of engravers' materials, formerly included with miscellaneous industries, is now classified with industries relating to printing and publishing. The statistics for 1923 and earlier years have been revised accordingly.

<sup>19</sup> Includes 183 establishments classified under "Coal-tar products" for 1919.

<sup>20</sup> "Rayon" included in "Chemicals not elsewhere classified" for 1923 and prior years.

<sup>21</sup> As to effect of the prohibition amendment, see note 5 to Table 756, p. 752. At the 1919 and 1921 censuses the malt-liquor industry was confined to cereal beverages (near beer and similar soft drinks) and in 1923 these were included under "Beverages." (See p. 756.)

<sup>22</sup> See footnote, 4.

<sup>23</sup> For 1914 "millstones" are included in "all other industries," p. 776.

<sup>24</sup> Formerly reported "Brick and tile, terra cotta, and fire-clay products."

<sup>25</sup> Includes data for bells, shown as a separate industry under "Metal Products" in previous reports.

<sup>26</sup> Not separately reported in 1914.

<sup>27</sup> None reported for 1925.

<sup>28</sup> Figures for 1925 not strictly comparable with those for 1923 due to the classification of the reports of several establishments in other industries.

<sup>29</sup> No comparable data.

<sup>30</sup> "Foundry and machine-shop products not elsewhere classified" include for 1914: "Iron and steel, processed," "machine tools," "steel barrels, kegs, and drums," and "textile machinery and parts," data for which were not specifically called for at that census.

<sup>31</sup> Figures for 1923 not strictly comparable with those for 1925 because of changes in classification.

<sup>32</sup> Data for establishments engaged solely in repair work are included for 1921, 1919, and 1914 but not for 1925 and 1923. The differences between the figures for 1923, 1921, 1919, and 1914 and those published in previous reports are due to the inclusion here and the exclusion from the previous reports of data for wheelbarrows.

<sup>33</sup> See footnote, 18.

<sup>34</sup> "Motion pictures, not including projections in theaters" includes for 1919 data formerly reported as "motion picture projection films," a subclassification of "photographic materials."

<sup>35</sup> At the census for 1925 it was possible, without disclosing the operations of individual establishments, to classify all establishments in the appropriate industries, and therefore no "All other industries" items are shown for 1925. For preceding census years the distribution was as follows: For 1923, "pulp from fiber other than wood," 2 establishments; "tin plate andterneplate, not made in rolling mills," 3. For 1921, "butter, reworking," 3; "oakum," 2; "ordnance and accessories," 3; "pulp, from fiber other than wood," 4; "tin plate andterneplate," 4. For 1919, "butter, reworking," 5; "ferroalloys," 30; "ordnance and accessories," 26; "pulp, from fiber other than wood," 5; "straw goods, not elsewhere classified," 1; "tin plate andterneplate," 24; "whalebone cutting," 1; and "wood carpet," 3. For 1914, "butter, reworking," 17; "millstones," 2; "ordnance and accessories," 2; "pulp from fiber, other than wood," 3; "pulp wood," 20; "tin plate andterneplate," 31; "whalebone cutting," 1; and "wood carpet," 6.

**No. 759.—SUMMARY FOR ALL MANUFACTURING INDUSTRIES COMBINED:  
BY GEOGRAPHIC DIVISIONS AND STATES**

[NOTE.—As to comparability of figures for 1921, 1923, and 1925 with those of previous years, see general note p. 749. Data for horsepower not collected in 1921. No data for the "Coffee and spice, roasting and grinding" or the "Automobile repairing" industry, nor for establishments with products valued at less than \$5,000, in any industry are included in the statistics here given for 1925, 1923, or 1921. For 1919 and 1914 the data for the two industries named have been eliminated from the United States totals for all items, as published at the censuses for those years, and the data for establishments with products valued at less than \$5,000 have been eliminated for all items except wages and primary horsepower. The figures for geographic divisions and States have not, however, been similarly adjusted.]

## No. 782.—TEXTILE MANUFACTURES: PRODUCTION

(NOTE.—In general, most of the articles listed are finished products, but large quantities of partly finished products, especially yarn, made for sale to other establishments of the same or other branches of the textile industry are included. This involves considerable duplication in total value of products and in cost of material. The products listed under each branch of the textile industry represent only the output of concerns classified as engaged primarily in that branch. Certain quantities, usually small, of some of the products are also made in establishments classed under other branches. In 1925, these amounts were as follows: Cotton goods, \$5,461,533 (not including cordage and twine mills); cotton-lace goods, \$312,820; other knit goods, \$2,265,816; silk goods, \$4,729,234; woolen and worsted goods, \$9,595,481; felt goods, \$803,528; wool-felt hats, \$472,093; carpets and rugs, \$150,572; cordage and twine and jute and linen goods, \$10,956,594; fur-felt hats, \$322,513; olecloth, linoleum, and asphalted-felt-base floor coverings, \$1,582,984; artificial leather, \$585,312.)

| Industry and product  | Quantity (thousands of unit specified) |           |           |           | Value (thousands of dollars) |           |           |

## No. 767.—CHEMICALS: PRODUCTS MADE FOR SALE

[NOTE.—The table includes products made in all industries, sometimes as by-products. In addition to quantities shown in the table, made for sale, large quantities of certain chemicals, especially acids, are made and consumed in further processes in the same establishment. There is considerable duplication in the total value of products due to the use of products sold by one establishment as materials for other establishments manufacturing chemicals]

<sup>1</sup> Not including value of rayon. (See footnote 4.)

<sup>2</sup> No data.

<sup>3</sup> Included in other ammonium compounds.

<sup>4</sup> Rayon treated as a separate industry for 1923—51,902,491 pounds, valued at \$98,097,875.

# No. 769.—MISCELLANEOUS INDUSTRIES INVOLVING CHEMICAL PROCESSES: CENSUS STATISTICS OF PRODUCTS

[NOTE.—Only major products of a fairly sharply defined character, and in general only those for which quantitative data are available are shown. See also chemicals (Table 767), petroleum refining (Table 738), manufactured gas (Table 727), etc. Semifinished products made for consumption in the same establishment are not included, except where otherwise stated, but there is some duplication in total value of products in certain branches, due to the use of such products as materials by other establishments in the same industry. Data include, except where otherwise stated, not only products of the major industry specified but also similar products made in other industries.]

| Industry and product                           | Quantity (thousands of unit specified) |           |           | Value (thousands of dollars) |         |         |         |

## No. 771.—MACHINERY: VALUE OF THE PRINCIPAL CLASSES MANUFACTURED

[NOTE.—Values in thousands of dollars. The various classes of machinery listed are products of a number of industries, such as "foundry and machine-shop products," "agricultural implements," "aircraft," "cash registers and calculating machines," "dairyman's, poultrymen's, and apiculturists' supplies," "electrical machinery, apparatus, and supplies," etc. This table is not an industry presentation, but a special presentation giving value of products for groups designated. The values are in part duplicated in other tables in this abstract, such as Tables 770, 772, 773, and 774.]

| Class   | 1914   | 1919   | 1921   | 1923   | 1925   |
|---|--------|--------|--------|--------|--------|
| Adding and calculating machines and parts     | 14,734 | 53,993 | 30,016 | 51,998 | 51,289 |
| Agricultural machinery                        | 94,866 | 94,080 | 56,126 | 52,120 | 23,471 |
| Aircraft                                      | 481    | 9,705  | 5,009  | 9,077  | 8,192  |
| Bakers' machinery and equipment               | 2,856  | 9,359  | 10,500 | 14,451 | 17,212 |
| Blowers and fans                              | (1)    | 12,141 | 12,818 | 14,386 | 16,219 |
| Bottling machinery                            | 1,350  | 10,468 | 6,642  | 5,900  | 10,139 |
| Clay-working machinery (brick, pottery, etc.) | 2,430  | 3,187  | 2,772  | 5,608  | 5,228  |
| Canning machinery                             | (1)    | (1)    | 5,139  | 9,601  | 9,795  |
| Cars and trucks, industrial and mining        | (1)    | (1)    | (1)    | 17,919 | 24,397 |
| Cash registers and parts                      | 15,935 | 31,574 | 22,944 | 44,393 | 42,326 |
| Cement and concrete machinery:                |        |        |        |        |        |
| Cement-making machinery                       | (1)    | (1)    | (1)    | 2,000  | 5,522  |
| Cement and concrete block machinery           | (1)    | (1)    | (1)    | (1)    | 1,461  |
| Concrete mixers                               | (1)    | (1)    | (1)    | 12,603 | 12,628 |
| Other cement and concrete machinery           | (1)    | (1)    | (1)    | (1)    | 5,094  |
| Condensers                                    | (1)    | (1)    | (1)    | 4,596  | 4,906  |
| Confectionery and ice-cream machinery         | (1)    | 9,341  | 2,187  | 5,639  | 5,142  |
| Conveying machinery:                          |        |        |        |        |        |
| Bucket type                                   | (1)    | (1)    | (1)    | (1)    | 14,717 |
| Belt type                                     | (1)    | (1)    | (1)    | (1)    | 5,691  |
| Other   | (1)    | (1)    | (1)    | (1)    | 7,379  |

No. 771.—MACHINERY: VALUE OF THE PRINCIPAL CLASSES MANUFACTURED—

| All other.....   | 57,290              | 230,252             | 146,270 | 219,094 | 256,796             |

<sup>1</sup> Figures not comparable with 1921, 1923, and 1925, because of change in classification; synchronous condensers and frequency changers reported with rotating converting apparatus for 1914.

<sup>2</sup> No comparable data.

<sup>3</sup> Not comparable with 1921, 1923, and 1925; does not include generators under 10 kilowatts. (See note 4.)

<sup>4</sup> Not comparable with 1921, 1923, and 1925; includes generators under 10 kilowatts, not used as automotive generators.

<sup>5</sup> Not reported separately.

<sup>6</sup> Not strictly comparable with figures for 1921, 1923, and 1925, because of changes in classification.

<sup>7</sup> Reported as motors for miscellaneous uses.

<sup>8</sup> Reported as "stoves and ranges" in 1914 and 1919 and as "ranges" in 1921.

<sup>9</sup> Not strictly comparable with preceding years; includes interior conduits only.

<sup>1</sup> The numbers and values of the complete vehicles manufactured in 1914 by establishments in the bodies-and-parts branch and in other industries are included in the totals but not in the distribution by class.

<sup>2</sup> Not reported separately.

<sup>3</sup> Figures refer only to tractors manufactured by establishments engaged primarily in the manufacture of motor vehicles. For total production of tractors, see Table 770.

<sup>4</sup> Not including cars built, or repair work done, by railroad companies.

<sup>5</sup> Figures not available.

<sup>6</sup> Includes 113 remodeled airplanes valued at \$193,000.

<sup>7</sup> Value of work done during year on aircraft under construction at close of year.

## No. 777.—COTTON SPINDLES, COTTON CONSUMPTION, AND STOCKS

[NOTE.—The statistics for 1915 to 1927 relate to the 12 months ended July 31, and those for prior years to the 12 months ended Aug. 31. South refers to cotton growing States. Consumption is expressed in running bales, counting round as half bales, except that all figures, 1840 to 1870, inclusive, and foreign cotton in all years are in equivalent 500-pound bales. The number of active spindles represents spindles operated for any time, however short, during the year, and is therefore an unsatisfactory measure of activity of the industry.]

| Year      | Cotton spindles (thousands) |        |           |             |              | Spindles using cotton with other fibers (thousands) | Cotton consumed, excluding linters <sup>1</sup> (thousands of bales) |           |             |              |

## No. 778.—COTTON SPINDLE HOURS AND COTTON CONSUMPTION

[NOTE.—Per cent of capacity represents ratio between (1) the actual number of spindle hours including overtime, double shifts, and part time, and (2) the total number of spindles in place multiplied by the number of hours per month in a single shift at normal full working time. Consumption includes both domestic and foreign cotton.]

<sup>1</sup>Separate accounts for alcohol produced at industrial alcohol plants required commencing May 1, 1920.

## No. 784.—LEAF TOBACCO: AMOUNTS CONSUMED IN THE MANUFACTURE OF CIGARS, CIGARETTES, CHEWING AND SMOKING TOBACCO, AND SNUFF

[NOTE.—All figures in thousands of pounds. Figures are unstemmed equivalent of all tobacco, stemmed, unstemmed, and scrap. Beginning with 1922 the Commissioner of Internal Revenue converted stemmed tobacco used in the manufacture of cigars and cigarettes to unstemmed at the ratio of 3 pounds stemmed to 4 pounds unstemmed. In previous years conversion was at the ratio of 3 to 5. In the following table figures are given on the new basis beginning 1918. On the old basis the quantity used for cigars in 1918 was calculated at 162,277,000 pounds, and that for cigarettes at 177,879,000 pounds.]

No. 785.—PRODUCTION OF MANUFACTURED TOBACCO

[NOTE.—Compiled from monthly returns of manufacturers. Data relate to products manufactured in continental United States and do not include cigars and cigarettes manufactured from imported tobacco in bonded manufacturing warehouses, which amounted in 1927 to 30,856,414 and 5,155,764,740, respectively. Large cigars and cigarettes are those weighing more than 3 pounds per thousand]

## No. 787.—BUILDING PERMITS ISSUED IN PRINCIPAL CITIES

[Note.—Figures do not include data for installation permits (those for installing boilers, signs, etc.) which are not strictly building operations but which were included in the figures originally published for 1923 and 1924. These permits are rather numerous but in value they are of small amount. The number figures represent the number of buildings covered by permits issued (new construction and repairs, etc.), rather than the number of permits. The cities shown include all cities having a population of 50,000 or over in 1920, and some cities having a population of 25,000 or over. The estimated cost of buildings authorized in 130 identical cities since 1914 is as follows: 1914, \$748,309,783; 1915, \$770,228,607; 1916, \$980,333,085; 1917, \$649,961,875; 1918, \$401,565,104; 1919, \$1,258,875,108; 1920, \$1,342,630,686; 1921, \$1,002,232,041; 1922, \$2,427,734,079; 1923, \$2,259,051,383; 1924, \$3,008,161,900; 1925, \$3,550,572,815; 1926, \$3,336,102,300; and 1927, \$2,992,454,182. Buildings authorized by permit are not always actually constructed, and actual cost of those constructed may differ considerably from that originally estimated.]

| City and State            | Total number of buildings |        |        |        |        | Proposed cost of buildings |                  |                  |                  |                  |

## No. 788.—BUILDING PERMITS ISSUED, BY CLASSES

[Note.—See headnote, Table 787. Figures for 1926 and 1927 represent 292 identical cities, while those for 1925 are for 272 cities only]

| Class of building                           | Number of buildings |          |          | Proposed cost (thousands of dollars) |             |             |
|---|---------------------|----------|----------|--------------------------------------|-------------|-------------|
|   | 1925                | 1926     | 1927     | 1925                                 | 1926        | 1927        |
| All buildings                               | 568, 627            | 508, 861 | 436, 677 | 1, 810, 907                          | 1, 623, 967 | 1, 313, 306 |
| Residential buildings                       | 396, 665            | 351, 494 | 306, 772 | 1, 464, 380                          | 1, 291, 577 | 1, 045, 611 |
| 1-family dwellings                          | 234, 899            | 200, 373 | 162, 499 | 1, 073, 124                          | 938, 578    | 778, 308    |
| 2-family dwellings                          | 38, 756             | 29, 860  | 25, 086  | 324, 480                             | 250, 795    | 207, 262    |
| 1-family and 2-family dwellings with stores | 5, 784              | 4, 169   | 3, 320   | 58, 855                              | 44, 105     | 34, 688     |
| Multi-family dwellings                      | 15, 109             | 14, 993  | 13, 612  | 709, 421                             | 793, 497    | 734, 225    |
| Multi-family dwellings with stores          | 1, 771              | 1, 502   | 1, 769   | 76, 564                              | 81, 162     | 89, 901     |
| Hotels                                      | 342                 | 306      | 201      | 171, 798                             | 145, 278    | 69, 393     |
| Lodging houses                              | 120                 | 60       | 77       | 1, 138                               | 808         | 1, 294      |
| Other                                       | 204                 | 233      | 208      | 49, 000                              | 28, 354     | 20, 339     |
| Nonresidential buildings                    | 265, 649            | 256, 365 | 229, 905 | 1, 345, 527                          | 1, 331, 410 | 1, 267, 695 |
| Amusement buildings                         | 1, 047              | 963      | 941      | 116, 284                             | 135, 480    | 127, 990    |
| Churches                                    | 1, 342              | 1, 188   | 1, 108   | 63, 363                              | 68, 098     | 58, 639     |
| Factories and workshops                     | 4, 986              | 4, 855   | 4, 189   | 173, 288                             | 179, 864    | 139, 223    |
| Public garages                              | 4, 960              | 4, 456   | 4, 166   | 83, 112                              | 75, 510     | 74, 124     |
| Private garages                             | 209, 086            | 197, 106 | 180, 174 | 88, 221                              | 75, 100     | 64, 944     |
| Service stations                            | 1, 095              | 4, 250   | 4, 861   | 12, 982                              | 15, 305     | 14, 856     |
| Institutions                                | 254                 | 290      | 329      | 53, 429                              | 49, 630     | 74, 874     |
| Office buildings                            | 1, 876              | 1, 711   | 1, 266   | 263, 895                             | 262, 563    | 242, 078    |
| Public buildings                            | 300                 | 277      | 334      | 23, 570                              | 31, 661     | 46, 150     |
| Public works and utilities                  | 615                 | 779      | 583      | 43, 890                              | 43, 820     | 44, 614     |
| Schools and libraries                       | 1, 088              | 886      | 620      | 163, 028                             | 152, 729    | 153, 977    |
| Sheds                                       | 17, 243             | 16, 523  | 13, 543  | 7, 475                               | 7, 356      | 5, 048      |
| Stables and barns                           | 565                 | 507      | 339      | 1, 301                               | 845         | 805         |
| Stores and warehouses                       | 15, 732             | 15, 702  | 13, 096  | 263, 091                             | 216, 381    | 213, 022    |
| All other                                   | 2, 603              | 5, 872   | 4, 206   | 8, 897                               | 15, 447     | 7, 142      |

<sup>1</sup> Based upon the cost of steel, cement, lumber, and rates paid common labor. The prices are weighted on the basis of the total production of steel, cement, and lumber, and the total supply of common labor.

<sup>2</sup> Designed to show the relative changes in the cost of constructing a standard concrete factory building.

<sup>3</sup> Prices of materials entering into the construction of a six-room house in 45 cities.

## TABLE 700.—BUILDING CONTRACTS AWARDED

**Notes.**—Covering small towns and rural districts as well as large cities. Certain public works (roads, etc.) not in the nature of buildings, have no floor space reported. The 36 States include all except Washington, Idaho, Montana, Oregon, Utah, Wyoming, Nevada, California, Arizona, New Mexico, and Texas, and comprise about seven-eighths of the total building contracts in the United States. The totals for the 27 States prior to 1919 cover only industrial and residential buildings.

(Values are in thousands of dollars; floor space in thousands of square feet)

<sup>1</sup> Including patents, designs, and reissues.

<sup>2</sup> Caveat law repealed June 25, 1910.

<sup>3</sup> July 28, 1836, to Dec. 31, 1850.

<sup>4</sup> Registration of labels suspended from May 27, 1891, to June 9, 1896.

<sup>5</sup> Figures include 4,282 renewals in 1926 and 3,063 in 1927.

# No. 794.—DEVELOPED AND POTENTIAL WATER POWER OF THE UNITED STATES

[NOTE.—Data for developed water power cover capacity of actual installation of water wheels and turbines, on Jan. 1, 1923, in plants of 100 horsepower or more. In November, 1921, the capacity of installation amounted to 7,926,968 horsepower and in March, 1925, to 10,037,665. The figures, given for potential power are estimates showing the 24-hour horsepower available 90 per cent of the time and 50 per cent of the time at an over-all efficiency of 70 per cent at all developed and undeveloped sites. These figures for potential power are not directly comparable with those for developed power, because developed power is usually given in terms of the capacity of the installed water wheels or turbines, which may be several times the potential power available 90 per cent of the time. Probably with complete development of the water-power resources of the whole country the installed capacity would amount to 80,000,000 horsepower or more.]

In thousands of horsepower]

# No. 795. ANNUAL SUPPLY OF ENERGY FROM MINERAL FUELS AND WATER POWER IN THE UNITED STATES

[The figures represent the equivalent of the heating power of the classes of fuel in trillions of British thermal units. Data represent production, except those for oil imports, and take no account of changes in stocks]

| Annual average or year | Anthracite coal | Bituminous coal | Total coal | Domestic oil | Natural gas      | Imported oil | Total oil and gas | Water power <sup>1</sup> | Grand total fuels and water power | Per capita million B. t. u. |             |

<sup>1</sup> The fuel equivalent for water power is calculated from the reported horsepower of installed water wheels. Prior to 1890 data were unsatisfactory, but estimates are included in the total.

<sup>2</sup> Based on the amount of coal displaced by gas, as estimated by the gas companies at the time.

<sup>3</sup> Preliminary.
